Group 5
- Test_calc '+' fails

Rubrics	Full Points (70%)	group5
1. User-space C application	10	
No compile error	3	3
Correct print to the console	7	7
2. Loadable Kernel Module	20	
No compile error	5	5
Insert module w/o errors (or kernel panic)	5	5
Remove module w/o errors (or kernel panic)	5	5
Correct print to the console in kernel msg	5	5
3. Write a calculator system call and calculator application in user app.	25	
Output correct calculation (+,-,*,/) Each has 5 points	20	15
Return fail for the invalid case	5	5
4. Hijack system call using LMK	35	
No compile errors / kernel panic	5	5
Correct modulo operation after inserting LKM	15	15
Correct operation after removing LKM	15	15
5. Write up	10	10
Total	100	95
